

As a physician, you see many many scenarios of special needs in your practice. (Perhaps you have special needs in your family). When you communicate with the parents you realize how the overwhelming nature of these situations can paralyze those responsible for their care.

Many times you may find that Mom and Dad do different types of activities with their kids – perhaps Mom takes them to the doctor and for therapy while Dad plays with them at night or helps them with their homework. Often the parents have so many tasks on the menu that they don't have time to know what is needed to care for their children in the future.

Special Needs Hawai'i, LLC is committed to helping families through the maze of legal and financial complexities surrounding planning for the future of children and other dependents with special needs. We help families secure both **lifetime care** and **quality of life** for their children or other dependents with special needs.

### Do you know?

- ✓ That if a family leaves more than \$2000\* (or their dependents accumulate more than this amount) to their dependent with special needs, **they may become ineligible for federal benefits**, including Medicaid?
- ✓ That a **Letter of Intent** can be a valuable planning tool that you, as their doctor, can help create with the family, that helps provide peace of mind and ensures the right care?
- ✓ How much **it will cost** your patient's family to care for their dependent with special needs?

**Many families do not know they need to have this information.** Many families do not know where to turn to get the information they need to plan for the future -- and **many of them may turn to you for the answers.**

### Now you can offer these families even more support.

Referring these families to Special Needs Hawaii can help provide direction and the resources to help answer their questions.

Special Needs Hawai'i helps families identify issues that may affect their dependents with special need's future, such as:

- ✓ quality of life,
- ✓ lifetime care,
- ✓ education funding, and
- ✓ financial issues (such as: how much does my child need?)

and provide solutions that may help those families progress into the future.  
Through the process of ***workshops, information-gathering and proper planning.***

You work hard to help ***provide the best care*** to your patients with special needs, and to give support to their families. Now you can give these families an additional resource – Special Needs Hawai'i, LLC
